IV. Pollution Prevention for Construction Sites DVD

I, _

_____, acknowledge that I have watched the *Storm Watch* training DVD on _____, and understand all the requirements to fulfill the Best Management Practices.

NOI/Site Notice has been attached with the permit application.

□Map and plans of construction site have been attached with the permit application.

Site or Project Name	Site Acreage Total size of your site/project (that you own/control): acres		
 Street Address or Location Description: Type of Construction Activity (check all that apply): Residential Commercial Industrial Highway or Road (city, county, state) Utilities (specify): Other (specify): 	Total area of soil disturbance (grading and/or excavating) for your site/project over the life of the project: acres. (Note: 1 acre = 43,560 ft².) Concrete / Engineered Soils How many yards of recycled concrete will be used over the life of the project? yd3 (estimate) Will any engineered soils be used? (For example: cement treated base, cement kiln dust, etc.) □ Yes □ No		
City (or nearest city): Zip Code: County:	Estimated project start-up date (mm/dd/yy): Estimated project completion date (mm/dd/yy):		

□ I agree this plan is in accordance with the GCHD's Erosion and Sediment Control Plan.

The Site Notice has been posted at the site. (Small Construction Site Notice - TCEQ Form 20963)

□This construction site is not greater than 30 acres. If greater than 30 acres, a phasing plan shall be implemented, please attach plan for review.

□The final SWPPP has been signed by a licensed professional engineer (PE), who verified that the design of all stormwater management practices have met the submittal requirements outlined in the stormwater design manual.

□ acknowledge that the GCHD will conduct routine inspections upon site completion to ensure that permanent postconstruction stormwater control measures are maintained and functioning properly.

VI. Existing Site Conditions				
1. Are you aware of contaminated soils present on the site?	□ Yes □ No			
2. Are you aware of groundwater contamination located within	n the site boundary? 🗅 Yes 🛛 No			
,	If you answered yes to questions 1 or 2, will any contaminated soils be disturbed or will any contaminated groundwater be discharged due to the proposed construction activity? Yes No			
["Contaminated" and "contamination" here mean containing any than natural background levels.]	hazardous substance that does not occur naturally or occurs at greater			
VII. Discharge/Receiving Water Information				
Indicate whether your site's stormwater and/or dewatering water	r could enter surface waters, directly and/or indirectly:			
 Water will discharge directly or indirectly (through a storm drain system or roadside ditch) into one or more surface waterbodies (wetlands, creeks, lakes, and all other surface waters and water courses). If your discharge is to a storm sewer system, provide the name of the operator of the storm sewer system: (e.g., City of Santa Fe): 				
Water will discharge to ground with 100% infiltration, with no potential to reach surface waters under any conditions.				
If your project includes dewatering, you must include dewatering plans and discharge locations in your site Stormwater Pollution Prevention Plan.				
VIII. Certification of Permittees				
a system designed to assure that qualified personnel properly ga the person or persons who manage the system or those directly r	Its were prepared under my direction or supervision in accordance with ther and evaluate the information submitted. Based on my inquiry of responsible for gathering the information, the information submitted is, olete. I am aware that there are significant penalties for submitting nt for knowing violations."
